▼ **Details****Implement THE Operator Overloading for class User**

1) Complete the implementation of the operator overloading for your user.h and user.cpp.

```
bool operator==(const User&) const;  
bool operator!=(const User&) const;  
bool operator>(const User&) const;  
bool operator<(const User&) const;  
bool operator>=(const User&) const;  
bool operator<=(const User&) const;
```

2) Implement the istream and ostream for your user.h and user.cpp

```
friend istream& operator >>(istream& in, User& user);  
friend ostream& operator <<(ostream& out, User& user);
```
